User Name

NMI3 is a European consortium of 18 partner organisations from 12 countries, including all major facilities in the fields of neutron scattering and muon spectroscopy. [Read more](#)

NMI3 members

WIKIPEDIA

■ New videos

- 6 schools
- 3 Neutron Imaging @ BNC

■ NMI3-I final brochure

- distributed at schools, facilities, ICNS

■ e-newsletter

- 8 issues (~ 1 per month)
- publicises all new website content

■ Neutron News:

- back-covers & articles (ICNS and neutronsources.org)

■ Notiziario: Industry Events and neutronsources.org

■ Conferences: ICNS

■     WIKIPEDIA

  HORIZON

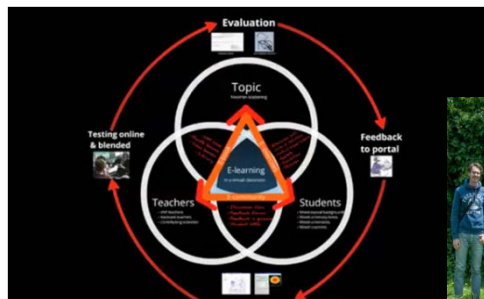

- **NaMES** (Neutron and Muon European Schools)

- logo!

- **NaMES schools:** NMI3 presentation

- Articles and videos

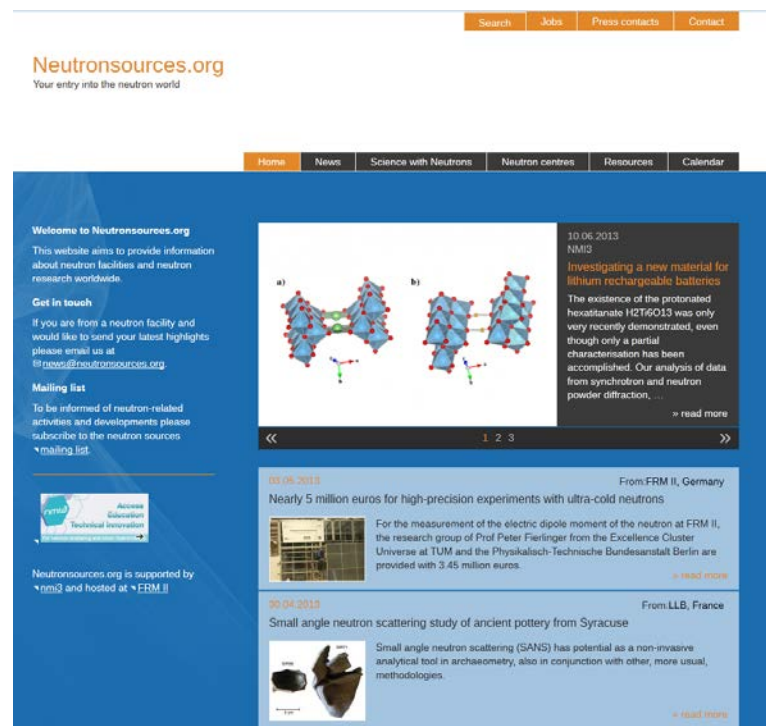

Oct-Nov ~ 1800 visits

- launched in July at ICNS
- 37 contributors
- next press officers' meeting soon

Neutronsources.org
Your entry into the neutron world

Home News Science with Neutrons Neutron centres Resources Calendar

Welcome to Neutronsources.org
This website aims to provide information about neutron facilities and neutron research worldwide.

Get in touch
If you are from a neutron facility and would like to send your latest highlights please email us at news@neutronsources.org

Mailing list
To be informed of neutron-related activities and developments please subscribe to the neutron sources [mailing list](#).

Access Gateway
Technical Innovation

Neutronsources.org is supported by [nmi3](#) and hosted at [ERM J](#)

10.06.2013
NMI3
Investigating a new material for lithium rechargeable batteries
The existence of the protonated hexafluoride H₂TfO₁₃ was only very recently demonstrated, even though only a partial characterisation has been accomplished. Our analysis of data from synchrotron and neutron powder diffraction, ... [read more](#)

01.08.2013 From:FRM II, Germany
Nearly 5 million euros for high-precision experiments with ultra-cold neutrons
For the measurement of the electric dipole moment of the neutron at FRM II, the research group of Prof Peter Fierlinger from the Excellence Cluster Universe at TUM and the Physikalisches Technische Bundesanstalt Berlin are provided with 3.45 million euros. [read more](#)

30.04.2013 From:LLB, France
Small angle neutron scattering study of ancient pottery from Syracuse
Small angle neutron scattering (SANS) has potential as a non-invasive analytical tool in archaeometry, also in conjunction with other, more usual, methodologies. [read more](#)

For better and faster results...

...please send me highlights from your JRA / facility!
