

## Diamond Light Source: Industrial Liaison Office

- We manage the industrial usage of Diamond through proprietary access and collaboration
- Currently 6 PhD scientists in team; new starter in Feb 14
- 70 unique industrial clients since April 2008

## Bottlenecks

- To grow the industrial usage of Diamond in non-pharmaceutical sectors
- Education of industrial researchers is key; contracts can take many years from first contact to beamtime

## Looking to the Future

- More collaboration and consultancy projects
- Physical science projects increasing
- No change in mission in near-term
- Joint European actions could help in education – using case studies from other facilities.
