

Dissemination and Outreach

Juliette Savin

Today's presentation

■ Current projects

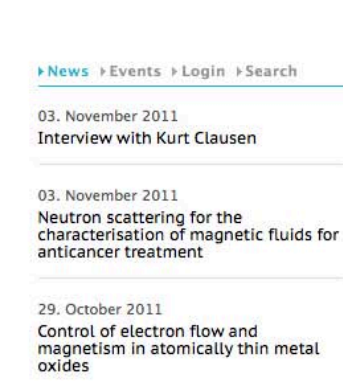

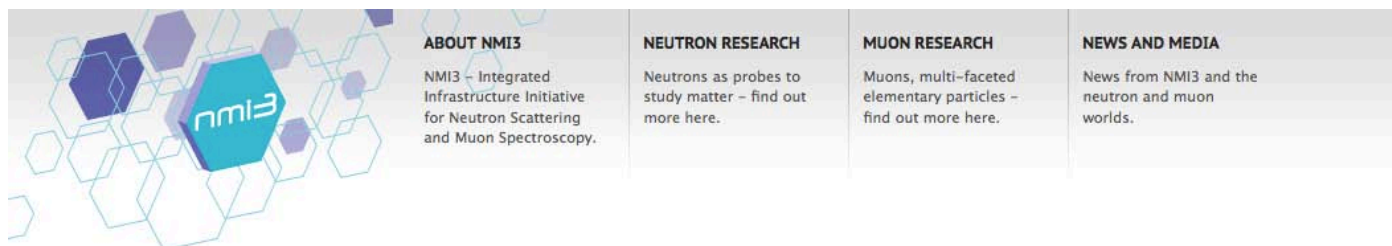

- New website
- Newsletter
- PR network

New website

Design

By Oliver Kreischer

Thank you to
Everyone who
has
Helped!

The NMI3 information portal

Your entry to NMI3 and the European neutron and muon worlds.

Go straight to the pages you are looking for by clicking on the tabs below, or use the menu at the top of the page.

New website

■ What has changed

- Simpler, clearer, easier
- More news, scientific highlights (RSS feeds?)
- Need to register to receive the newsletter – tell your colleagues!
- Calendar + meeting registration
- Access pages
- JRA pages
- Picture gallery: please contribute
- Education pages
- This is work in progress!

New website

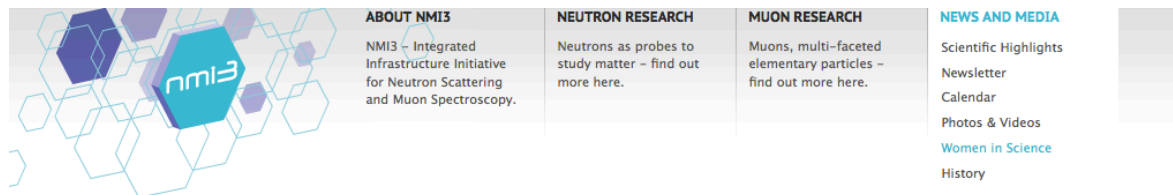

■ Instrument finder

- New simpler version of current pathfinder
- Instrument form being designed – clear and easily searchable
- Contact instrument responsables from your facility
- Will be integrated to the neutron, muon and education pages

New website

■ Women in neutron research

- We need you to:
- Fill in the questionnaire and return it
- Send me pictures

	ABOUT NMI3 NMI3 – Integrated Infrastructure Initiative for Neutron Scattering and Muon Spectroscopy.	NEUTRON RESEARCH Neutrons as probes to study matter – find out more here.	MUON RESEARCH Muons, multi-faceted elementary particles – find out more here.	NEWS AND MEDIA Scientific Highlights Newsletter Calendar Photos & Videos Women in Science History

▶ **WOMEN IN SCIENCE**

- ▶ More women in Science
- ▶ Links

▶ [News](#) ▶ [Events](#) ▶ [Login](#) ▶ [Search](#)

03. November 2011
Interview with Kurt Clausen

03. November 2011
Neutron scattering for the characterisation of magnetic fluids for anticancer treatment

29. October 2011
Control of electron flow and magnetism in atomically thin metal oxides

Women in Science

How many women hold senior positions in neutron research in Europe? How many women work with neutrons in Europe and Worldwide?

The 7th Framework Programme of the European Commission strives to **promote gender equality in scientific research**, by facilitating the participation of women scientists and integrating the gender dimension into research content in all research areas. NMI3, as a project supported by FP7, wants to contribute to this gender initiative.

Below are open-hearted interviews with women working in neutron or muon science and on the page to the left, you will find a list of more women working these fields.

▶ **Regine Willumeit**

Studies and PhD in Physics (Diploma on Neutron Activation Analysis and PhD on Spin Contrast Variation to study the Ribosome Structure). Habilitation in biochemistry Ribosome structure and RNA).

Newsletter

■ *Inside NMI3*

- Biannual newsletter – issue 1 published in July, next in November
- Aimed at neutron & muon & other, scientists and students
- Distributed online via website and mailing list and printed
- Three main sections: **Activities, News from around the World, Coordination & Management**
- JRA coordinators – articles: sample environment, polarised neutrons, deuteration

Newsletter

■ Highlights from our Access Programme

- Thank you to all Access coordinators and all contributors!
- For newsletter but also website News section
- And brochures – Neutrons & Energy brochure
- Research that generated **results/ paper/ paper & press release / paper, press release & coverage!**
- Hot topics: earth& environment, energy, health, life sciences, cultural heritage, info & com technologies

Newsletter

■ Picture competition

- Before each issue of Inside NMI3, to find a cover
- Invite users/scientists/technicians to submit pictures
- 15 pictures in the first edition
- Thanks to all who helped promote it!

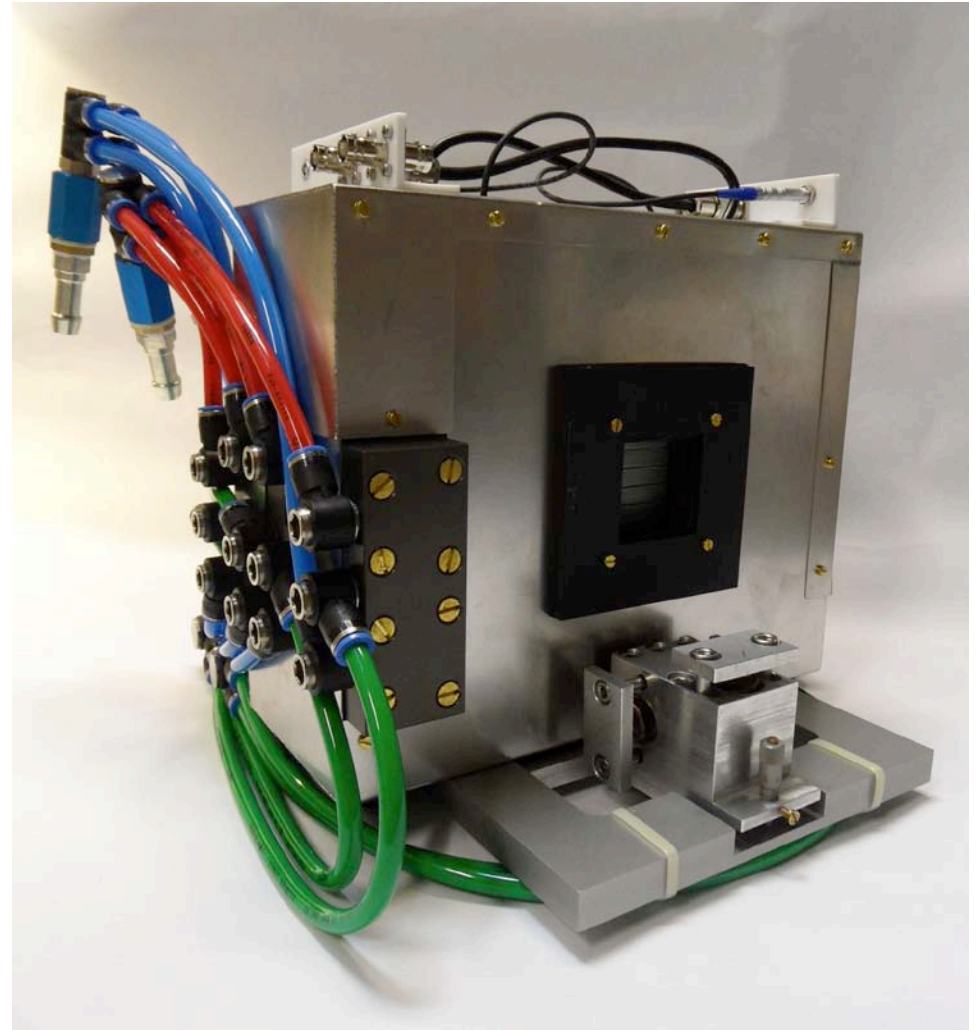

Newsletter

- Picture competition – 1st prize – Martin Kreuzer HZB

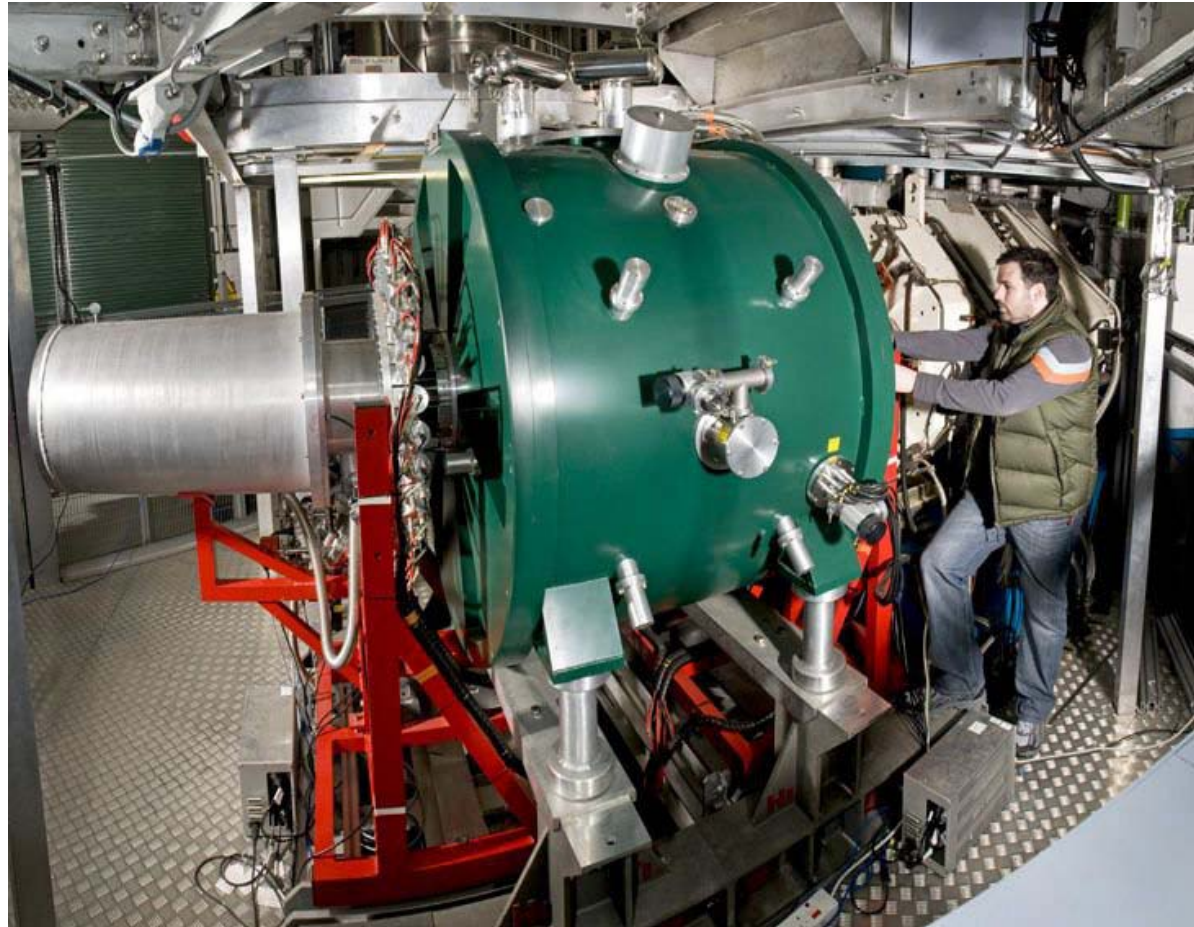

Newsletter

- Picture competition –
2nd prize –
Sergei Klimko LLB

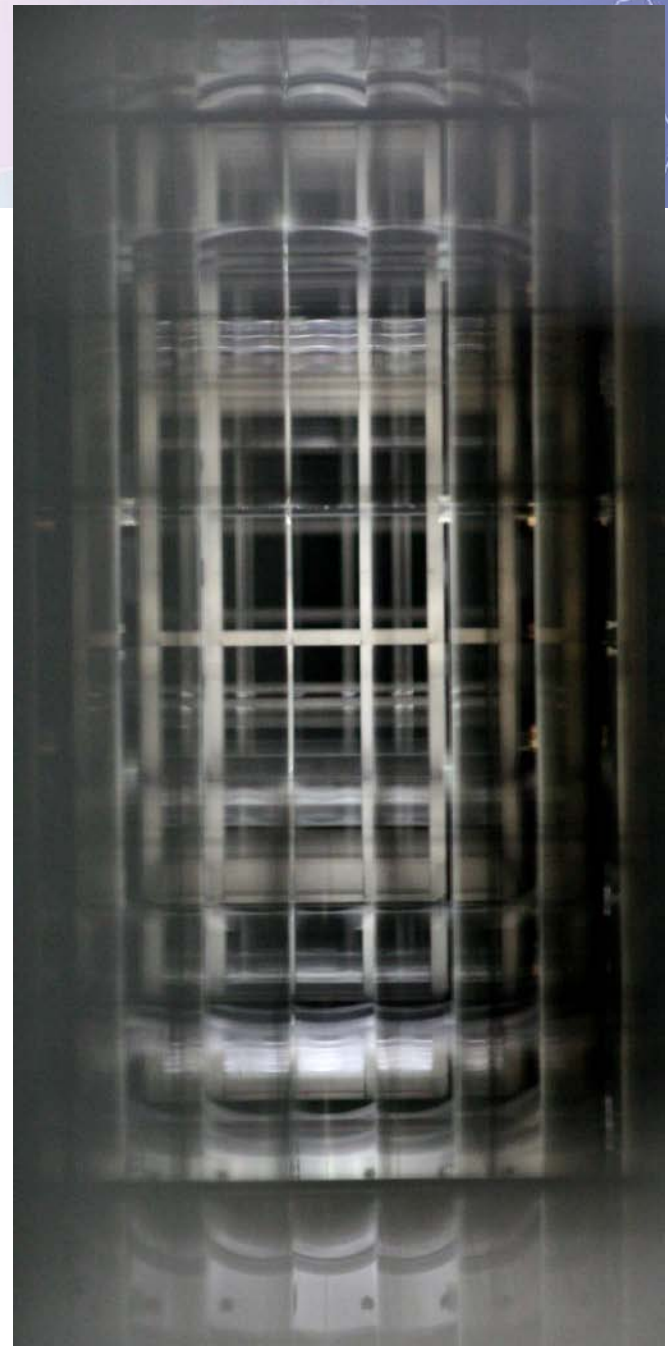

Newsletter

- Picture competition
2nd prize –
Stephen Kill ISIS

Newsletter

- Picture competition –
2nd prize – Marcus Trapp HZB

Newsletter

■ Picture competition

3rd prize –
Stephen Kill ISIS

New projects

■ PR network

- All PR& communications officers of European neutron & muon facilities
- 1st meeting end of November 2011
- So far really good turn out
- Aim to integrate PR & communications activities

Other activities

- **Advertising** – Neutron News – new calendar

2012: BNC, launch of new project, HZB, SINQ-PSI

2013: ISIS, HZG, FRMII, JCNS

2014: RID, NPI, LLB, BNC

- **Schools & Workshops** – summaries, pictures, logos for website and brochure
