

Reactor Institute Delft: Valorisation

- The Delft University must do research, educate and “valorise” (by order of the government)
- 1 valorisation employee for the reactor, \pm 50 for the university as a whole
- Annual income about 300 k€ for the reactor institute
- About 25 clients

Bottlenecks

- Neutron techniques are widely unknown, and
- Commercial companies tend to keep their problems to themselves,
- So how do we discover each other?
- And then there's the IP hurdles...

Looking to the Future

- Getting better with cold neutrons and increased focus on valorisation.
- Trend: More work wanted all the time: 1 M€ is the goal for future years
- Could joint European actions help? ScienceLink seemed successful...
